

Describe a caf you like to visit.

1. Where it is
2. How often you go there
3. What you usually do there
4. and explain why you like this place

Well, sometimes I'd like to go to the caf after work in the evening, before I go back home. It's just located in the first floor of my office building. In fact, its a tiny cafe with several tables inside. When the weather is good, people love to eat outside to enjoy the fresh air. I usually go there, 2-3 times in a week and enjoy the coffee and environment they offer.

question 1

question 2 and 3

reason 1: food is good and cheap

I like to go to this caf because the food is very tasty, and the prices are extremely reasonable. They offer a wide range of coffee, including espresso, Americano and cappuccino, with a great choice of dishes, like cheese burger, seafood salad, chicken pizza and ice cream. I often order espresso here because they only use premium coffee bean. I also believe the coffee machine they work on is a very advanced one, which gives a high temperature so it could make coffee very tasty. The price of the dessert here is only 75% of that in the other restaurants. But the quality is totally the same.

key 1 wide range

key 2: good beans, good equipment

key 3: give the specific price, 75%

reason 2: staff here is friendly

Another reason why this cafe attracts me a great deal lies in the staff here. The boss is a friendly old man, and the waitresses remember their customers and even what they like to eat. They often give us a small discount when we ask for the bill: they know how to retain their clients. I remember once when I stepped in, one of the waitresses said with smile "a cup of espresso and a piece of cheese cake?". Surely I said "yes please". After I sat down, the boss came to make conversation with me, talked the weather and asked me something about my day. All these made me feel at home. **That's what really counts.**
